Test documentation - Student Assessment System

Test suite: TS-01
Test suite name: Grade evaluator
Created by: Yago dos Santos
System Version: 1.0

Description

This project involves the development of a grading evaluation system that calculates and classifies student performance based on their final grade.

Objective

The objective of this project is to create Java application that evaluates students' performance based on their grades. The system should be structured with clearly defined classes and methods, including a student class containing attributes like name and final grade, and a grading class responsible for calculating the classification.

Test Case

CASE TEST	INPUT	RESULTS	FINAL THOUGHTS
testClassificacaoExcelente	nome: Maria, nota final: 95	Excelente	OK
testClassificacaoBom	nome: Carlos, nota final: 80	Bom	OK
testClassificacaoRegular	nome: Luis, nota final: 60	Regular	OK
test Classificacao Insuficiente	nome: Pedro, nota final: 42	Insuficiente	OK
testClassificacao Reprovado	nome: Lucia, nota final: 20	Reprovado	OK
